技术栈 / 技能

AI/大语言模型

深度学习，自然语言处理（NLP）、计算机视觉（CV），PyTorch、Keras 等模型开发框架，模型微调、迁移学习、模型压缩等技术。熟悉 RAG、提示词工程等大模型应用技术，Langchain、LlamaIndex 等框架，多 Agent 系统（MAS）。

后端/前端 开发

Python、Golang、常见数据库及中间件。Typescript/JS、Angular。

数据科学

Numpy, pandas, seaborn, scikit-learn等，熟悉常见基于统计的机器学习、集成学习算法。

云原生/DevOps

容器化、微服务、Kubernetes。CI/CD、IaC, Jenkins。MLOps。

架构设计/产品迭代/项目管理

具备快速技术调研、方案整合能力，以及快速原型实现与高质量产品交付能力。具备敏捷开发实践经验。

语言

中文（母语），英文（流利）。

工作经历

Freelance & 人工智能学习与实践

2023.04 - 至今

承担多个项目的开发与咨询工作。深入学习并实践人工智能相关技术，积极跟踪 AI 领域前沿进展，持续应用于实践项目。开发基于 RAG 技术的智能问答系统，实践领域模型微调、RAG 优化及 Agent 编程等技术。

Gap years

2019.11 - 2023.04

专注于哲学学习与研究。

Daocloud DCE 团队 - 高级软件工程师

2018.04 - 2019.11

负责 DCE（DaoCloud Enterprise）核心功能开发，设计并实现支持多集群的 API 网关、操作日志及审计系统。主导向自主知识产权硬件平台的迁移工作。向团队引入敏捷实践、CI 流水线及测试驱动开发（TDD），显著提升开发效率与代码质量。

联想 LiCO 团队 - 软件工程师

2016.12 - 2018.04

参与 LiCO（Lenovo Intelligent Computing Orchestration）HPC 平台开发，设计并实现用户系统、开发引导系统、告警系统及节点管理命令行工具。

韩创科技 - 软件工程师

2015.06 - 2016.12

负责全栈开发及 Python 网络爬虫。

教育经历

上海建桥学院

2011.09 - 2015.07

本科，电子科学与技术专业。

Yufeng Wang

TECH STACK / SKILL SET

AI/LLM

Deep learning, NLP, CV; model development using PyTorch/Keras, fine-tuning, transfer learning, and model compression techniques. Proficient in LLM application techniques including RAG, prompt engineering, and frameworks like Langchain/LlamaIndex; experience with Multi-Agent Systems (MAS).

Backend/Frontend Development

Python, Golang, common databases & middleware. Typescript/JS, Angular.

Data Science

Proficient with data science libraries (Numpy, Pandas, Seaborn, Scikit-learn); familiar with common statistical ML and ensemble learning algorithms.

Cloud Native / DevOps

Containerization, microservices, Kubernetes. CI/CD, IaC, Jenkins. MLOps.

Architecture Design / Iteration / Project Management

Skilled in rapid technical research, solution integration, rapid prototyping, and delivering high-quality products. Experience in agile development practices.

Languages

Chinese (native), English (fluent).

WORK EXPERIENCE

Freelance & AI Study and Practice

2023.04 - Present

Provided development and consulting services for multiple projects. Deeply studied and applied AI technologies, actively tracking advancements and integrating them into practical projects. Developed an intelligent RAG-based Q&A system, implementing domain-specific model fine-tuning, RAG optimization, and Agent programming.

Gap years

2019.11 - 2023.04

Focused on philosophical studies and research.

DaoCloud DCE Team - Senior Software Engineer

2018.04 - 2019.11

Developed core features for DCE (DaoCloud Enterprise), designing and implementing a multi-cluster API gateway, operation logging, and audit systems. Led the migration project to a proprietary hardware platform. Introduced agile methodologies, CI pipelines, and Test-Driven Development (TDD) to the team, significantly improving development efficiency and code quality.

Lenovo LiCO Team - Software Engineer

2016.12 - 2018.04

Contributed to the development of the LiCO (Lenovo Intelligent Computing Orchestration) HPC platform, designing and implementing the user system, developer onboarding system, alerting system, and node management CLI tools.

HanChuang Technology - Software Engineer

2015.06 - 2016.12

Responsible for full-stack development and Python web scraping tasks.

EDUCATION

Gench College, Shanghai

2011.09 - 2015.07

Undergraduate, Electronic Science and Technology.
